§ 169.220

operating conditions remain unchanged, the information need not be resubmitted.

INSPECTION FOR CERTIFICATION

§169.220 General.

- (a) An inspection is required before the issuance of a certificate of inspection.
- (b) An inspection for certification is not made until after receipt of the information required in §169.205(a) of this subchapter.

§ 169.221 Initial inspection for certification.

- (a) The initial inspection includes an inspection of the hull structure, yards, masts, spars, rigging, sails, machinery, and equipment, including unfired pressure vessels.
- (b) The initial inspection of a vessel being newly constructed or converted normally consists of a series of inspections during the construction or conversion
- (c) The inspection ensures that the vessel and its equipment comply with the regulations in this subchapter to the extent they are applicable to the vessel being inspected, and are in accordance with approved plans. The inspection also ensures that the materials, workmanship and condition of all parts of the vessel and its machinery and equipment are in all respects satisfactory for the service intended, and that the vessel is in possession of a valid certificate issued by the Federal Communications Commission, if required.
- (d) Before construction is started, the owner, operator, or builder must develop plans indicating the proposed arrangement and construction of the vessel. This list of plans to be developed and the required disposition of these plans are set forth in §169.305.

§ 169.222 Scope of inspection for certification.

Items normally included in an Inspection for Certification are:

- (a) Structure.
- (b) Watertight integrity.
- (c) Pressure vessels and appurtenances.
 - (d) Piping.

- (e) Auxiliary machinery.
- (f) Steering apparatus.
- (g) Electrical installations.
- (h) Lifesaving appliances.
- (i) Navigation equipment.
- (j) Fire detecting and extinguishing systems.
 - (k) Pollution prevention equipment.
 - (l) Sanitary conditions.
 - (m) Fire hazards.
- (n) Verification of valid certificates issued by the Federal Communications Commission.
- (o) Lights and signals required by navigation rules.
 - (p) Bilge and ballast systems.
- (q) Rigging, yards, masts, spars, and sails.

§ 169.223 Subsequent inspections for certification.

An inspection for renewal of a certificate of inspection includes an inspection of the structure, machinery, yards, spars, masts, rigging, sails, and equipment. The inspection ensures that the vessel is in satisfactory condition, fit for the service intended and complies with the applicable regulations in this subchapter.

REINSPECTION

§ 169.225 Annual inspection.

- (a) Your vessel must undergo an annual inspection within 3 months before or after each anniversary date, except as specified in §169.226.
- (b) You must contact the cognizant Officer in Charge, Marine Inspection to schedule an inspection at a time and place which he or she approves. No written application is required.
- (c) The scope of the annual inspection is the same as the inspection for certification as specified in §169.222 but in less detail unless the cognizant marine inspector finds deficiencies or determines that a major change has occurred since the last inspection. If deficiencies are found or a major change to the vessel has occurred, the marine inspector will conduct an inspection more detailed in scope to ensure that the vessel is in satisfactory condition and fit for the service for which it is intended. If your vessel passes the annual inspection, the marine inspector will
